Congratulations to the winner of the Go-Lab Summer Mini Video Contest!

In August 2014, Go-Lab started a new collaborative activity asking its social media friends and followers to create short videos and animations explaining Go-Lab in a simple way.

The voting was closed September 14th and Elena Vladescu from the "Nicolae Titulescu" National Vocational College in Slatine, Romania, won the contest having received the most votes. You can find the winning video [here](#).

Dear Sirs,

Weeks passed by, summer has come and gone and a lot of things happened. In this newsletter, you can find information about past and upcoming events which you shouldn't miss! To get informed weekly, join our [social community channels!](#)

Go-Lab will be represented at the Scientix Conference in Brussels

Around 550 teachers, policy makers and project managers are expected to participate in the 2nd Scientix Conference - a major networking event in STEM education - that will take place 24-26 October 2014 in Brussels, Belgium.

During this big event, the Go-Lab project will be presented with an own booth demonstrating the Go-Lab Portal, Inquiry Learning Spaces and a live-demo using the Faulkes Telescope.

You can find more information about the conference on the [Scientix website!](#)

Go-Lab Summer School 2014 - successfully completed!

The 2nd Go-Lab Summer School was successfully carried out in Marathon, Greece from July 13th to July 18th, 2014.

Participants became well acquainted with the idea of Go-Lab, Inquiry Learning Cycle and Spaces, and the additional tools provided by the Go-Lab Repository.

Extra activities and visits of the Acropolis, the observatory of the Ellinogermaniki Agogi School and the cape Sounio complemented the whole program.

New Addition to the Go-Lab Portal: Phet Labs

PhET is a very popular site housing over 120 science simulations and has over 45 mil visits per year. On August 28th, 2014, representatives of the PhET team visited the University of Twente. During the meeting the Go-Lab Portal and PhET simulations were demonstrated and discussed. An agreement was settled to include a number of the PhET labs (with a first focus on the new HTML5 based labs) into the Go-Lab Portal.

You can find the first intergrated PhetLab [here](#).
